SEP 24 1947

MEMORANDUM TO: Executive for Security and Inspections

SUBJECT: Employment of Consultants

1. At the request of the President's Air Policy Commission, this office is now occupied with a comprehensive project in the field of air policy. The project must be completed by 1 November 1947. It is necessary to secure additional analytical assistance to meet this commitment, partly due to resignations in the ORE group working on the project.

2. ORE proposes to employ two or three WAE consultants to assure successful completion of the project within the allotted time.

3. The original request from the President's Air Policy Commission was unclassified, and a large part of the documents to be processed will likewise be unclassified. It is believed that these consultants, without security check, can be given desk space in non-IAB agencies, such as the Department of Commerce, Maritime Commission, and the Library of Congress. Arrangements have already been made for the cooperation of such agencies with ORE in the preparation of certain portions of the project. The consultants would coordinate the contributions of these agencies and would only occasionally enter ORE offices on a visitor's status to report on their activity and to receive instructions. They would have on these occasions no access to classified material.

4. In view of the impossibility of proceeding with the usual security clearance in time to make the consultants available for this project, permission is requested to engage selected personnel under the conditions outlined above with a limited security procedure.

5. The following name is submitted for this limited security clearance:

25X1A

25X1A

Mr. ▆▆▆▆ has been employed as a Commercial Analyst by various Government agencies for approximately eight years, and has a permanent rating, having been laid off by the Maritime Commission due to reduction in force.

6. The additional names will be submitted in the near future.

25X1A

Assistant Director
Reports and Estimates
